### Typical Application Circuit

Figure 2 Typical application circuit

Non-polarized ceramic capacitors are acceptable. If polarized tantalum or electrolytic capacitors are used, they should be connected as shown in Figure 22. The recommended capacitor value of C1 to C4 is in Table 1. If the power supply is possibly connected to 3.3V or 5.5V, all cap as 0.2uF is suggested in the application.

4.5 to 5.5	0.1	0.1
